PROJECTS

Craftopia Ecommerce

Project Description:

Through this platform, users can buy unique handcrafted goods. Admins have the ability to manage products, coupons, and users.

Features:

- **Project Showcase:** Admins can seamlessly add and display a variety of handcrafted projects.
- **Secure Authentication:** Backend authentication ensures a safe and trusted user experience.
- **Google OAuth Integration:** Simplified login process using Google accounts for convenience.
- **Opt Verification via Twilio:** Secure user verification through Twilio for added security.
- **Firebase for Image Storage:** Effortless storing and retrieval of static images for projects.
- **Razorpay Payment Gateway:** Reliable payment processing for seamless transactions.
- **MongoDB Database:** Robust database management for efficient data handling.

Github:- Click Here

Technologies Used:

- **Node.js:** Backend implementation for authentication and server-side operations.
- **Express.js:** Web application framework for building a robust server.
- **MongoDB:** Database management system for efficient data storage.
- **Google OAuth:** Integration for simplified and secure user login.
- **Twilio:** Verification service ensuring user authentication.
- **Firebase:** Storage solution for static image files associated with projects.
- **Razorpay:** Payment gateway integration for seamless transactions.
- **Bootstrap:** Frontend framework for sleek and responsive design.
